

National Consortium of Slovenian Energy Agencies

Stanislav Sraka
Nedelišče, 9.5.2008

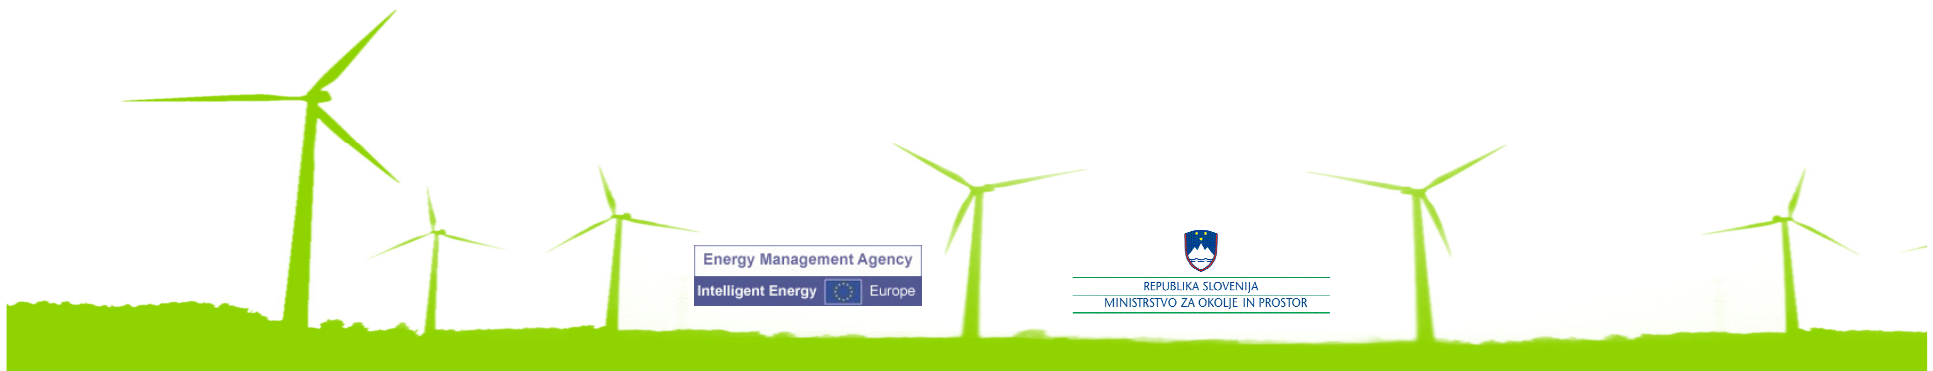

Establishment

Since 2005 there were established 6 Local Energy Agencies in Slovenia, supported by Intelligent Energy Europe programme (IEE), local communities and Ministry of the Environment and Spatial Planning.

Groundwork of LEAS Consortium

- Vision and Mission of Energy Agencies;
- Lack of information about LEAS existence;
- The positioning of integrated image on national and European level;
- Compatible function and joint programme;
- Designated functional areas;
- Promotion of LEAS' mission and vision;
- Promotion of activities by achievement of national and European targets.

Founders

Purpose

Establishment of joint framework for collaboration and realization of set priorities based on three programme points.

Purpose

Establishment of joint framework for collaboration and realization of set priorities based on three programme points.

Energy management

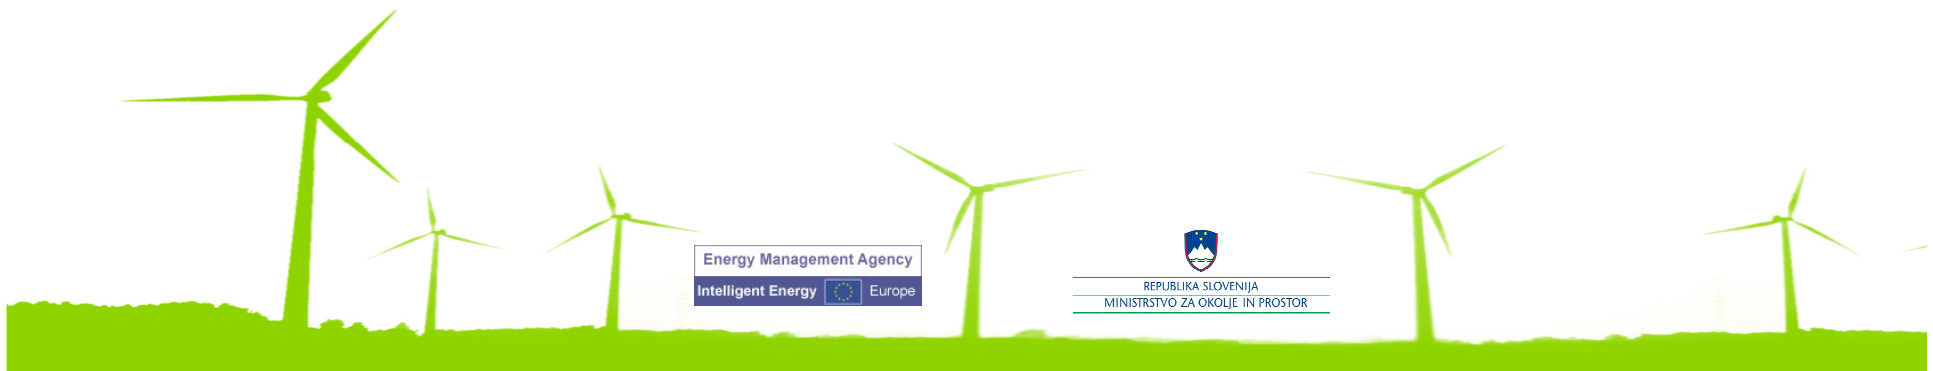

Energy database

Public awareness, promotion and dissemination of results.

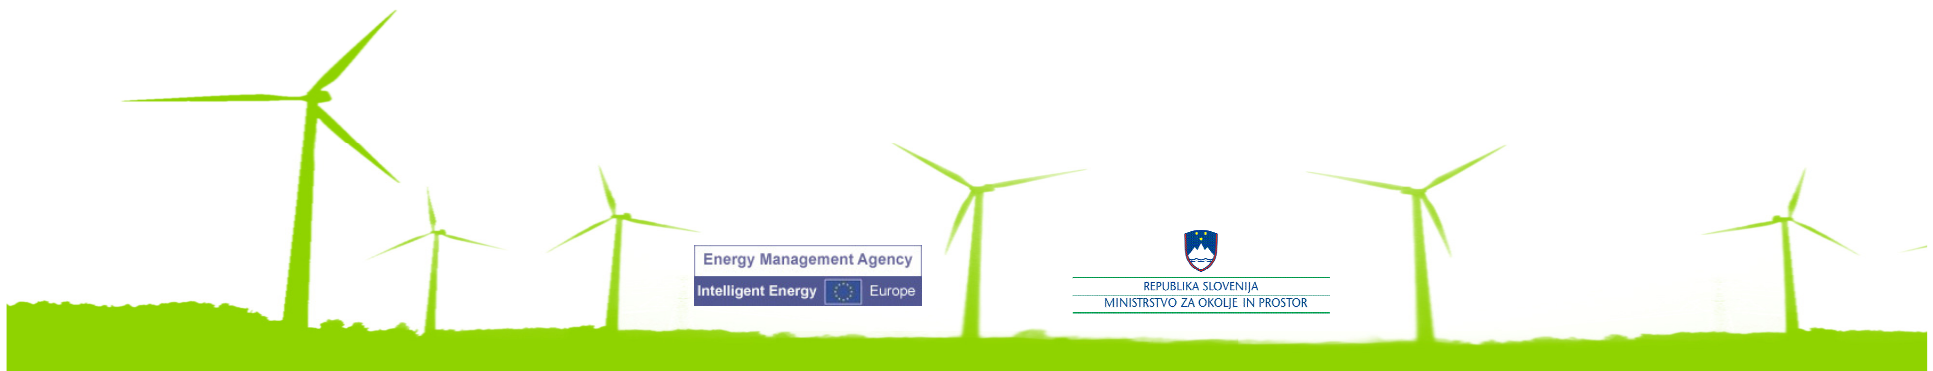

Energy management

- Promotion, preparing of basis, support offer and implementation of green public contracting for target groups,
- Organization and implementation of action programme for energy concepts;
- Preparing of legal measures and basis for permission and agreements issues of public sector energy investments on local level;
- Collaboration and support by the energy cards issue of public and private buildings.

Energy database

- Preparing the basis and data about energy supply and energy use, as well as recording the RES and RUE potentials,
- Collection coordination, the very collecting process, data analysis, management and updating of database on national level.

Public awareness, promotion and dissemination of results

- Creation of common image and joint cooperation between the individual energy agencies on national level;
- Promotion of RES and RUE in the framework of the national promotion strategy;
- Transfer of information, emanated from the legal acts of the European and national legislations on the field of local communities, legal entities and citizens, which is going to be based on the mutual cooperation between the members and exchange of good practices,
- Informing and awareness of target groups about the current energy events.

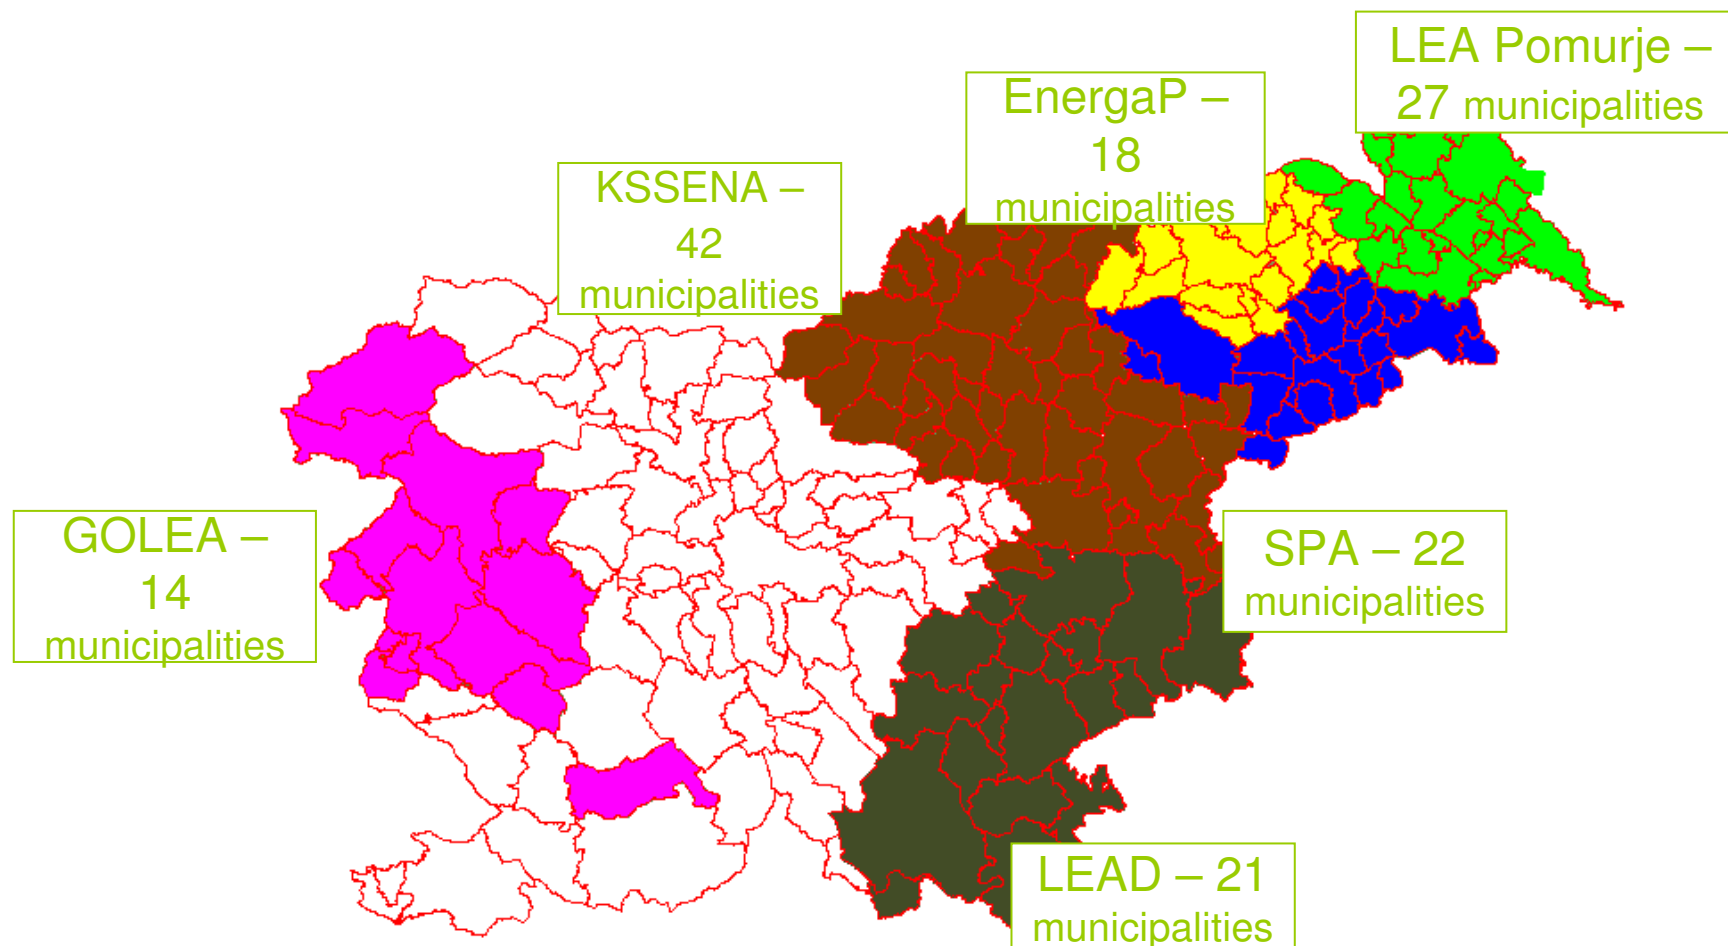

Consortium representation

- The Energy Agency will manage and represent the Consortium,
- Consortium coordinator is the Director of an Agency;
- 6 months mandate for individual representative;
- Exchange – Energy agencies – incorporation.
